

Mr. Heermance has rendered a distinct service in making available to the student a large number of written codes of ethics adopted by various organizations in the United States, so that they may be examined and compared. It would have added greatly to the value of the book, to one who examines it purely as a matter of reference, if there had been an index covering the subjects treated in the various codes. It is interesting to note that the bulk of these codes have been adopted within a comparatively recent period. Evidently lawyers and business men of all sorts have become conscious of their obligations to the community, and are seeking to set up codes which will help to make universal the ethics practiced by the best men in each occupation.

HARRISON HEWITT

Yale University, School of Law.
